Dr. Ray Bohlin Engages in Embryonic Stem Cell Debate

Dr. Ray Bohlin was recently (3/11/09) a guest on a radio talk show concerning President Obama's Executive Order expanding federal funding for embryonic stem cell research. This was on station KPFT in Houston, a "Progressive" (liberal) radio station. The other guest was Dr. P.Z. Myers, in his own words "a godless liberal," a biologist at the University of Minnesota at Morris. He hosts what is called the most popular science blog in the nation, <u>Pharyngula</u>. The host of the program, Geoff Berg, could probably also be described in the same way. The hour-long show is archived <u>here</u>. You might be interested to listen to Dr. Bohlin explain his viewpoint in a sometimes hostile environment.
